

Digital Onboarding via Passports/IDcards

One unified platform to onboard people, issue credentials, and grant access – instantly and securely

The Challenge

Organizations still rely on **unsecure, slow, and costly onboarding processes**:

- Long queues and human-dependent checks
- High exposure to identity fraud, spoofing, and deepfakes
- Expensive back-office operations
- Increasing pressure on privacy, data protection, and compliance

The Solution

Premier Enterprise is a **digital onboarding kiosk** that automates identity verification, including passport, ID card or resident permit verification through identity document readers and by performing 3D facial verification with a 3D camera. Once authentication is complete, solution can issue various credentials, delivering a **fast, contactless, and privacy-first user journey**.

No Passwords. No PINs. No OTPs No biometric database. No documents download. No selfies.

Key Advantages

- **Ultra-fast onboarding:** frictionless, contactless, < 200ms authentication
- **High security:** eliminate fake accounts, >99.99% biometric accuracy, resilient to photo & video deep fakes
- **Privacy-by-design:** biometric data remains under user control, CNIL type 1 / GDPR / CCPA compliant
- **Lower operational costs:** automation replaces manual checks and reception desks
- **Interoperability:** supports Thales, Desko, Plustek document readers, interfaces with your legacy systems
