

Secure 2FA Access Control with Orange PackID Mobile Badges

Frictionless, high-security access using 3D biometrics and Orange Pack ID mobile badges

The Challenge

Traditional access control systems face growing limitations:

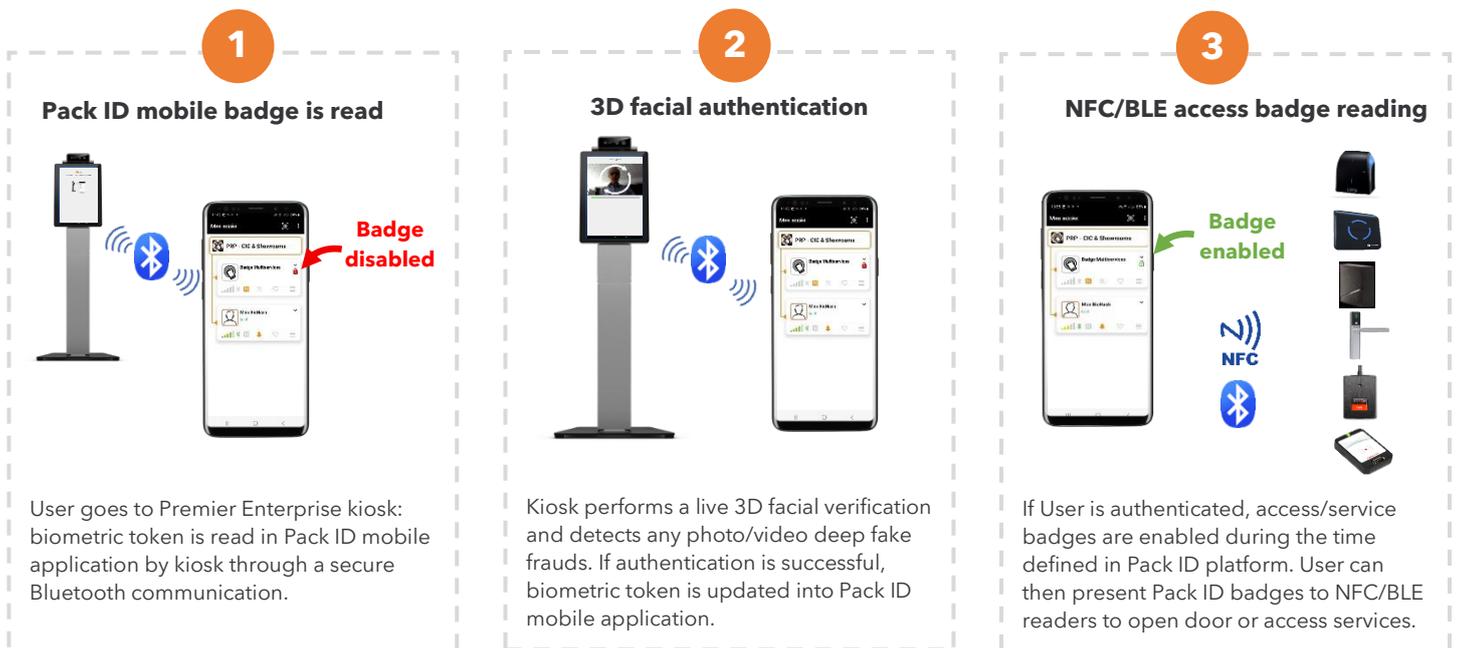

- Badge sharing, lost cards, and stolen credentials
- Weak single-factor authentication: authenticating a badge is not authenticating a person
- High operating costs and up to 15-20% badges to renew annually
- Poor user experience with PINs, passwords, or OTPs

Organizations need **stronger security without adding friction while saving costs**

The Solution

Premier Enterprise, combined with **Orange Pack ID mobile badges**, delivers a true 2-factor access control solution:

- Something you have: a secure mobile badge (Pack ID)
- Something you are: live 3D facial biometric authentication

Key Advantages

- **True 2-factor authentication:** mobile badge + 3D facial authentication
- **Premium security level:** >99.999% accuracy, instant activation/deactivation, photo/video deep fakes blocked
- **Contactless & fast UX:** <0.5 second access, day or night, 24/7
- **Privacy-by-design:** GDPR / CNIL / CCPA compliant, no biometric database
- **Low-effort integration:** many badge readers compliant with PackID such as STID, ARD, Kelio, RFIdeas, Elatec...
- **Cost-cutting:** no more plastic badges, multi-tenants, multi-sites, fixed licensing model per kiosk
