Automated Visitor Management Solution

Instant, secure and contactless visitor solution – from registration to access badge issuance
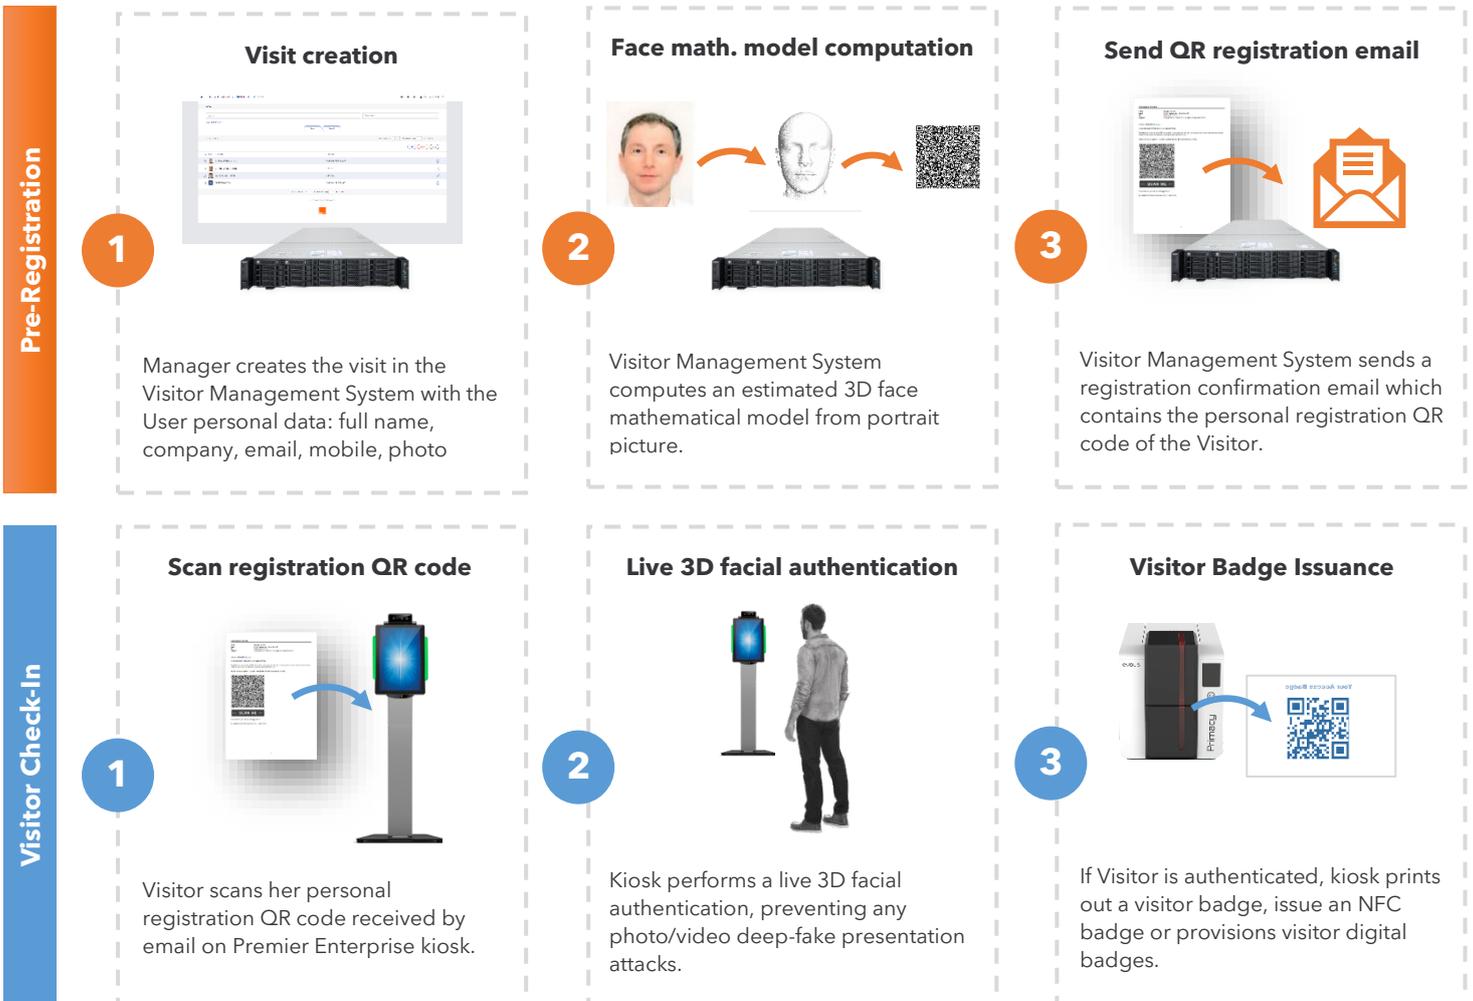

The Challenge

Visitor access and badge issuance are often **manual, slow, and costly**:

- Long waiting lines at reception desks
- High staffing and operational costs
- Weak identity checks and badge sharing risks
- Poor visitor experience and limited traceability

The Solution

Premier Enterprise automates the **entire visitor access journey**, from pre-registration to badge or ticket issuance and secure entry – delivering a **fast, self-service, and highly secure experience**.

No manual checks. No passwords. No friction. 24/7 Service.

Pre-Registration

Visit creation

1

Manager creates the visit in the Visitor Management System with the User personal data: full name, company, email, mobile, photo

Face math. model computation

2

Visitor Management System computes an estimated 3D face mathematical model from portrait picture.

Send QR registration email

3

Visitor Management System sends a registration confirmation email which contains the personal registration QR code of the Visitor.

Visitor Check-In

Scan registration QR code

1

Visitor scans her personal registration QR code received by email on Premier Enterprise kiosk.

Live 3D facial authentication

2

Kiosk performs a live 3D facial authentication, preventing any photo/video deep-fake presentation attacks.

Visitor Badge Issuance

3

If Visitor is authenticated, kiosk prints out a visitor badge, issue an NFC badge or provisions visitor digital badges.

Key Advantages

- **Fast visitor flow**: no queues, instant issuance, 24/7 availability
- **Enhanced security**: prevents badge sharing, impersonation, and photo/video deep fake fraud
- **Lower reception costs**: fewer staff, automated processes
- **Privacy-first design**: GDPR / CNIL / CCPA compliant, no biometric database
- **Flexible deployment**: integrates with existing access control and visitor systems
