

Digital Onboarding through Access Control System

One unified platform to onboard people, issue credentials, and grant access – instantly and securely

The Challenge

Organizations still rely on **unsecure, slow, and costly onboarding processes**:

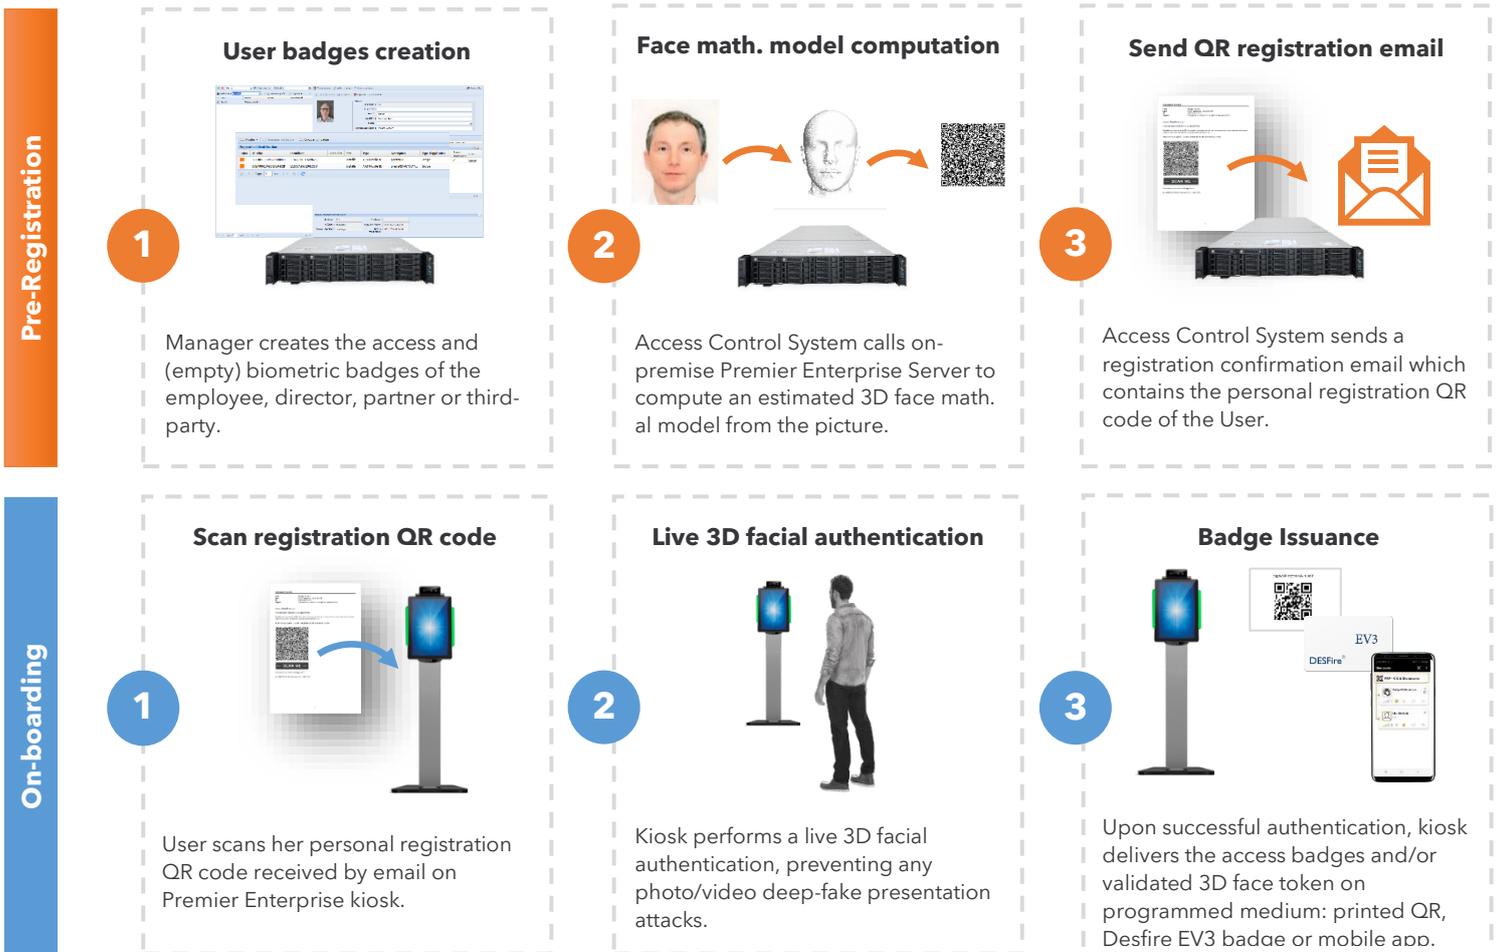

- Long queues and human-dependent checks
- High exposure to identity fraud, spoofing, and deepfakes
- Expensive back-office operations
- Increasing pressure on privacy, data protection, and compliance

The Solution

Premier Enterprise is a **digital onboarding kiosk** that automates identity verification by interfacing with your legacy Access Control System. Optionally, user's identity can be double-checked by reading the user's passport, ID card or resident permit and performing an additional 2D-3D facial biometric verification. Once authentication is complete, solution can issue various credentials, delivering a **fast, contactless, and privacy-first user journey**.

No Passwords. No PINs. No OTPs No biometric database. No documents download. No selfies.

Key Advantages

- **Ultra-fast onboarding:** frictionless, contactless, < 200ms authentication
- **High security:** >99.999% biometric accuracy, resistant to photo & video deep fake presentation attacks
- **Privacy-by-design:** biometric template remains under user control, CNIL type 1 / GDPR / CCPA compliant
- **Lower operational costs:** automation replaces manual checks and reception desks
- **Seamless integration:** connects to legacy access control, visitor management, ERP, HR or identity systems
